

Bonding/Grounding Straps

Harger's Complete Line of Bonding/Grounding Straps are Unparalleled!

- High quality straps for today's demanding power and grounding applications.
- Offer flexible bonding between bond points such as switchgear, substation, transformer and generators.

Providing a superior/low resistance permanent ground path, Harger's line of Bonding/Grounding Straps deliver the power and reliability your next bonding and grounding project needs.

Terminal Ends

- Terminal ends come tinned as standard
- Bare, silver, nickel are available
- Ends swaged to braid

Braid

- Pure copper braid Electro-tin plated as standard
- Flexible braid for bonding misaligned bond points
- RoHS Compliant
